

Table 1 – Evaluation of the Model

Statement/Question	Strongly disagree %	Disagree %	Undecided %	Agree %	Strongly agree %
The brachial plexus model (wood and wires) was a useful learning tool in aiding understanding of how five ventral rami (roots) mix to form the upper, middle and lower trunks	0	7	11.5	37.5	44
The brachial plexus model (wood and wires) was a useful learning tool in aiding understanding of how the trunks form divisions	0	6	10	47	37
The brachial plexus model (wood and wires) was a useful learning tool in the aiding understanding of how divisions then form cords and cords form branches	0	7	13	44.5	35.5
The brachial plexus model (wood and wires) was a useful learning tool in aiding understanding that the main branches contain different root values	0	7	9	47.5	35.5
Cadaver specimens were useful learning tools in aiding understanding of the concepts of the brachial plexus	0	3	14	53	30
The lecture was a useful learning tool in aiding understanding of the concepts of the brachial plexus	1	11	16.5	52	19.5
A lecture alone would have been sufficient in aiding understanding of the concepts of the brachial plexus	48	37	6	4	5

There are 155 students enrolled in the second year medical class. Of the 148 who attended 133 completed the evaluation (90% compliance).
